Naga Rushi Kaja

+91 95536 98315 rushikaja@gmail.com rushi KN

OBJECTIVE

Graduate in Computer Science and Artificial Intelligence seeking a dynamic role to apply data-driven and intelligent solutions to real-world challenges. Passionate about using technology to improve customer experience, optimize operations, and contribute meaningfully to impactful projects, while continuously learning and supporting the organization's vision.

WORK EXPERIENCE

1.HR Square (Heritage Foods Limited)
Aug 2025 – Sep 2026

Web Developer
Hyderabad, India

- **Business Analytics Dashboard**
- Designed and developed an interactive **business analytics dashboard** using **Python (Flask)** to visualize key performance indicators (KPIs) across departments.
- Processed and analyzed Excel data using **Python (Pandas)** for data cleaning, aggregation, and transformation before visualization.
- Integrated **Python-based Plotly** and **Matplotlib** to display dynamic charts, tables, and insights from Excel and SQL data.

- **Inward Freight Optimization**
- Analyzed **inward freight and transportation data** using **Python** to identify patterns, cost drivers, and opportunities for improving logistics efficiency.
- Applied **AI/ML models** to analyze freight-related data and support data-driven decision-making for **route, transportation, and cost optimization**.
- Performed **data preprocessing, feature analysis, and model-based evaluation** to identify factors influencing freight costs and operational performance.
- Generated analytical insights to help improve **freight planning, operational efficiency, and cost-effectiveness** across inward logistics operations.

- **Data Integration and Reporting Automation**
- Connected **Excel workbooks** and **SQL Server (SSMS)** databases to the **Python–Flask backend** for real-time data retrieval and updates.
- Developed Flask routes and APIs in **Python** to automate data refresh cycles and reflect live business metrics.
- Automated **report generation and email delivery** using Python, enabling periodic business reports to be generated and shared with relevant stakeholders.

INTERNSHIP

Heritage Foods Limited
May 2025 – July 2025

Gen AI Developer Intern – Digital Transformation (DX)
Hyderabad, India

- Built and deployed an enterprise-grade chatbot: **"AI-Powered Natural Language Chatbot for Real-Time Business Intelligence"**.
- Integrated **OpenAI GPT-4**, **LangChain**, and use-case-based **prompt engineering** to handle internal business queries dynamically.
- Used **RapidFuzz** for NLP-based fuzzy term matching and query preprocessing to simulate **Retrieval-Augmented Generation (RAG)**.
- Connected chatbot with live data via **SQL Server (SSMS)** and Excel using **pyodbc** for instant response to departmental questions.
- Built a lightweight web interface using **Streamlit** and **Plotly** for visual insights, reports, and dashboards.
- Applied **machine learning** models to analyze trends and power smart decision-support visuals.
- Deployed chatbot on a cloud-hosted **AWS Ubuntu EC2 instance**, ensuring secure, scalable, and real-time production access.
- Collaborated across departments (Sales, Marketing) to tailor the chatbot for business-critical KPIs and automation use cases.

EDUCATION

Prasad V. Potluri Siddhartha Institute of Technology **2022 – 2026**
B.Tech in Computer Science and Engineering (AI and ML) ***CGPA**: 8.8*

Sri Chaitanya Junior College **2020 – 2022**
Intermediate (MPC) ***Percentage**: 91%*

Sree Balajee Vidyalayam **2018 – 2020**
Class 10th ***Grade**: A*

PROJECTS

Multimodal Contactless Stress Detection | Swin Transformer, PyTorch, DeepFace, MediaPipe, Gemini AI

- Developed an **AI-driven real-time stress and well-being monitoring system** by combining facial expressions, eye movements, posture, and keyboard/mouse behavioural signals for multimodal stress detection.
- Fine-tuned a **Swin Transformer** on the **DAiSEE dataset** for four-class engagement classification (Bored, Confused, Engaged, Frustrated), achieving **80.6% accuracy**.
- Implemented facial and behavioural analysis using **MediaPipe, DeepFace, and Pynput**, with a stress fusion engine combining multiple signals into a unified stress score.
- Integrated **Google Gemini API** to generate personalized well-being recommendations, AI-assisted guidance, and automated session reports while following a **privacy-first** approach.

Product Review Sentiment Analysis | BERT (NLP), Flask, Pandas, Sklearn

- Built a sentiment analysis tool tailored for consumer product reviews using the BERT language model, focusing on customer satisfaction trends and feedback mining.
- Developed a Flask-based web interface that provides real-time sentiment classification, enabling companies to understand customer emotions and improve product quality and service.
- Preprocessed and cleaned large-scale review data, visualized insights using Pandas and Matplotlib, and trained the model to assist in data-driven decision-making.

Real-Time Chat Application | MERN Stack, Socket.io, TailwindCSS, DaisyUI, Zustand, JWT

- Developed a secure and scalable real-time messaging platform using the MERN stack integrated with Socket.io for instant communication between users.
- Implemented JWT-based authentication and Zustand for global state management, ensuring a smooth and protected user experience.
- Created a responsive and user-friendly UI with TailwindCSS and DaisyUI for a seamless experience across devices.

Orrery Web App | Three.js, Machine Learning, NASA Small Body Database

- Designed a 3D interactive solar system model featuring asteroid tracking using Three.js.
- Implemented ML algorithms to forecast potential asteroid impact patterns using data from NASA's Small Body Database.
- Project demonstrates capability in predictive modeling and scientific data integration.

SKILLS

Programming Languages: Python, Java

AI & Generative AI: Machine Learning, Deep Learning, NLP, Generative AI, LLMs, Transformers, Hugging Face, LangChain, RAG, Embeddings, Vector Databases, Prompt Engineering, AI Agents

Technologies/Frameworks: Flask, Streamlit, Scikit-learn, PySpark, Node.js

Version Control/ Developer Tools: Git, GitHub, VS Code, Vercel, Render, AWS EC2 (Ubuntu)

Databases & Data Handling: MySQL/SSMS, Postgresql, Data Preprocessing, ETL (via Pandas/Flask)

Analytics & Visualization: Power BI, Excel, Data Analysis with Pandas, Forecasting Models

Relevant Knowledge: API Integration, REST APIs, ERP Concepts, Basic Understanding of Business Workflows

CERTIFICATIONS

Soft Skills	NPTEL
Design and Analysis of Algorithms	NPTEL
Machine Learning	NPTEL
AI-ML Virtual Internship	EduSkills & AWS Academy
Generative AI Virtual Internship	EduSkills & Google Cloud

ACHIEVEMENTS

- 2nd Place (India Level) - NASA International Space Apps Challenge 2024. Awarded for creating an innovative solution in a team focused on space exploration and technology.

CO-CURRICULAR ACTIVITIES

- Participated in Internal Hackathon conducted by Codegnan. Worked on developing innovative solutions.
- Participated in RBI Quiz. Engaged in testing financial knowledge and problem-solving skills related to banking and finance.
